ABOUT

"I am a Computer Science graduate dedicated to bridging the gap between aesthetics and functionality through UI/UX Design, Front-End Development, and System Data Analysis. I have a strong passion for exploring the latest technologies to create digital solutions that are both relevant and efficient.
One of my key strategic achievements was my contribution to the 'One Data Universitas Lampung' project. I successfully developed a faculty and study program accreditation management system by integrating university APIs with internal databases. This solution significantly improved data processing efficiency and ensured that accreditation information is centralized and accurate. I view technology as a vital instrument to optimize workflow and drive sustainable business growth. For me, every line of code and every design element must offer a real-world solution. I am eager to collaborate, exchange ideas, and explore challenging opportunities to deliver technological innovations that are not only advanced but also truly impactful

EDUCATION

Computer Science| University of Lampung
GPA : 3.63/4.00

SOFT SKILLS

- Effective Communication & Collaboration
- Multi-tasking, Adaptive and Flexible
- Analitycal, Critical & Logic Thinking
- Teamwork
- Time Management
- Leadership & Emotional Intelligence
- Problem Solving & Decision Making
- Negotiation
- Creative & Inovative

HARD SKILLS

- Import & Export Product and Service Knowledge
- Proficiency in Education Information Systems
- Data Management & Input Verification
- Microsoft Office
- Systems Analysis & Application Workflow Mapping
- Fundamentals of Artificial Intelligence (AI)
- Effective CS–IT Liaison (Bridging Role)
- Dasar Keamanan Informasi (Cybersecurity Awareness)
- Software Development Fundamentals
- Basic Technical Troubleshooting
- UI/UX Awareness in User Interactions

EXPEREINCE

Computer Science| University of Lampung

- Assistant Lecture - MTK Discrit
- Assistant Lecture - Communication Data and Network
- Assistant Lecture - Programing Web
- Served as an Undergraduate Teaching Assistant for Discrete Mathematics, Data Communication, and Web Programming. Facilitated recitation sessions to clarify complex materials, led academic discussions, and provided personalized guidance to enhance students' conceptual understanding.

UPT TIK University of Lampung

- **2023 - Fullstack Developer (Website)** — **2023**
  - Collaborated with cross-functional teams and management to design and iterate the accreditation system for the University of Lampung
  - Designed the UI/UX for the University of Lampung's accreditation system website, focusing on a user-centric and intuitive interface
  - Engineered and implemented a comprehensive accreditation system for all faculties at the University of Lampung utilizing the Laravel framework, Bootstrap, PHP, HTML, CSS, and JavaScript.
  - Executed and optimized database queries using Microsoft SQL Server to ensure efficient data management and retrieval.
  - eveloped standardized accreditation indicators for every faculty and department within the University of Lampung ecosystem.
  - Established and assigned 'A', 'B', and 'C' accreditation ratings for each faculty based on predefined performance metrics and indicators.

PT Bukit Asam Tbk.

- **2023 - Backend Developer (Website)** — **2022 - 2023**
  - Developed a mobile application named SIMAMA, designed as a platform for collaborative design discussions with the Assistant Manager of the Production Division.
  - Collaborated with the Assistant Manager to conceptualize and design the SIMAMA application interface and features
  - Coordinated with the IT team to design and implement Application Programming Interfaces (APIs) for the SIMAMA application.
  - Designed the system workflow for SIMAMA (Asset Management System) to align with employee requirements and operational needs.

ANDANAN BATIK LAMPUNG

- **2023 - Frontend Developer (Website)** — **2023**
  - Cultivated effective communication and empathy through active interaction with clients (Andanan Batik Lampung team) and UI/UX designers.
  - Implemented UI/UX designs using WordPress to meet the specific requirements and branding of the Andanan Batik Lampung team.
  - Experienced in translating technical solutions into easy-to-understand language and maintaining a patient, client-focused approach.
  - Strengthened problem-solving skills by conducting thorough testing and ensuring high-quality application performance.
  - Conducted user training sessions to ensure the Andanan Batik Lampung team achieved an optimal understanding of the developed products and services.

PT. Greenpia Indah Indonesia

- **2025 - Administration**
  - Managed timber data entry utilizing cubic volume measurements for accurate inventory tracking.
  - Analyzed timber procurement based on species, dimensions (width and length), and quality grading.
  - Processed and filtered daily and monthly employee records to ensure organized data management.
  - Prepared comprehensive documentation and compliance paperwork for international timber exports.

PT. Skarsindo Sejahtera Harapan (SSH)

- **2026 - IT Staff** — **2026 - Now**
  - Architected & Developed Centralized Platform: Spearheaded the end-to-end development of "Siapp Sistem Hub" (SSH) using PHP and JavaScript. This internal platform successfully integrated cross-divisional activities and fleet data (vehicles and drivers) into a single, highly efficient digital ecosystem.
  - Optimized System Performance: Significantly enhanced system responsiveness and reliability by optimizing APIs within the driver and vehicle data management modules with MySQL database.
  - Centralized Database Management: Managed and structured real-time standby vehicle data into the system, facilitating highly accurate and centralized fleet monitoring.
  - User Collaboration & Iterative Testing: Collaborated directly with end-users through continuous feedback loops and iterative testing to ensure an intuitive system interface that effectively solves real-world user problems.
  - Ensured Seamless IT Operations: Took full ownership of maintaining and troubleshooting the corporate network infrastructure. Provided rapid, responsive hardware and software support to guarantee smooth business operations with minimal downtime.
  - Technical Documentation: Authored comprehensive, well-structured technical documentation for Siapp Sistem Hub to ensure long-term sustainability and ease of future system maintenance.

PROJECT

- Kopi Yay - Aplikasi Mobile
- SI Dimsum - Fullstack Developer berbasis Website
- SIMAMA - Backend Developer Aplikasi Mobile
- One Data Accreditation - Fullstack Developer Berbasis Website
- Andanan Batik Lampung - Frontend Developer berbasis website
- Siapp Sistem Hub

PENGALAMAN ORGANISASI

Himpunan Jurusan Ilmu Komputer (HIMAKOM)

- coordinator - Pratice TIK (2021)
- Coordinator Division - Pekan Raya Jurusan IX & X (2021 - 2022)

Rois FMIPA Universitas Lampung

- Head of Division External (2022)

SERTIFIKASI

- UI/UX Designer Beginner - KMMI (2021)
- Code Generation and Optimization - IBM (2023)
- Junior Web Developer - Digitalent Kominfo (2025)
- Data Classification and Summarization - Hacktive8
- Laravel : Pemula sampai Mahir - Udemy

BAHASA

- Inggris
- Indonesia
